Web Services

EDUCATION

Laney College | Oakland, CA

Associates of Science in Computer Programming (3.66 GPA)

Focused on advanced programming principles in Java and Python. Developed strong algorithmic thinking. Completed notable projects, such as a DoorDash Java app with SQL database integration and game development featuring custom graphics.

EXPERIENCE

April, 2024 – Present

Freelance Programmer | Self-Employed

Working freelance on both front- and back- end development, web design, and software development. Communicating with clients to understand and produce desired results. Ensure code is efficient and works correctly.

2013 – 2020, May 2022 - Present

Bartender | Bay Area

Took an active role in ordering and staff training, showcasing organizational and leadership skills. Developed strong customer service, teamwork, and conflict resolution skills in a dynamic and fast-paced environment.

August 2020 – April 2022

Electrician | GRID Alternatives

Played an active role in pioneering GRID's first EV Charger program, contributing to the company's expansion into sustainable energy solutions. Collaborated with the lead electrician to install and commission residential PV systems, EV chargers, and Tesla Powerwalls. Conducted site visits, contributing to design and permitting processes.
